

Did you know...?

A major cost-cutting move may be to replace a full-time staff member by outsourcing.

One of our clients, a Schaumburg-based manufacturer, cut their accounting related expenses by more than 66% by replacing their chief financial officer (CFO) with our part-time CFO and accounting services.

Are you working IN or ON your business?

Are you spending too much time working on:

- Tax compliance
- Accounting or Bookkeeping tasks
- QuickBooks data entry and reconciliation

and not enough time expanding your business? Are your efforts worthwhile?

Think about it, has your current accountant:

- Made certain they are available to help you make key business and/or financial decisions?
- Made costly errors?
- Given you the correct and most effective advice in a timely manner?
- Consistently reviewed your current needs such as cash flow, insurance or tax liability?
- Reviewed tax saving ideas with you to minimize your tax liability?
- Discussed cost reduction methods to improve your company's efficiency and profitability?
- Reviewed your financial statements with you lately?
- Evaluated what your company is worth?
- Kept you up to date with recent tax law changes that affect your business?

If you cannot answer yes to each of these questions, perhaps it is time to search for a new, competent and proactive accountant. And if you don't use an accountant at all, perhaps you should. Now is the time to take your personal and business success to the next level.
